

# NORWAY Discovery Digest

**An illustrated  
geoscience overview  
of drilling activity  
and exploration potential.**

Stay ahead and fully informed with the most comprehensive exploration publication for offshore Norway. Coverage includes the North Sea, Norwegian Sea and Barents Sea.

The Norway Discovery Digest features:

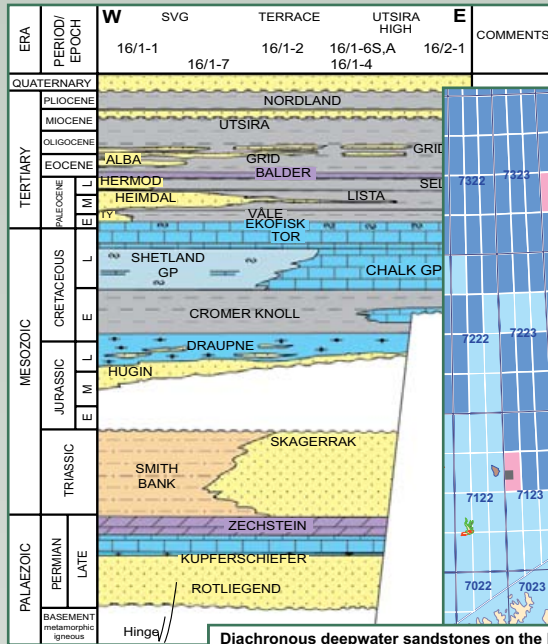

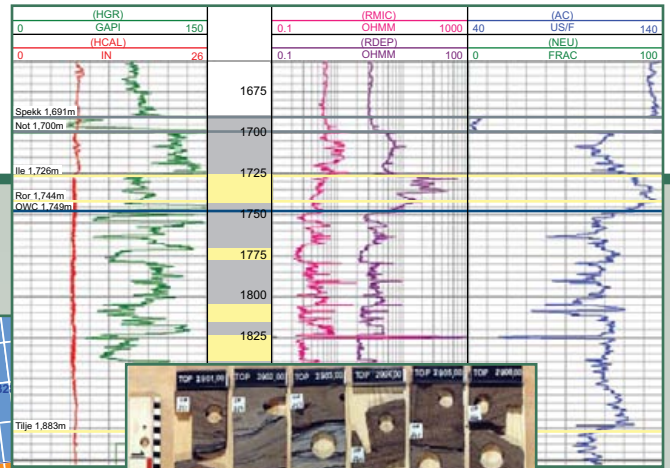

- Licensing Round Reviews
- Feature Articles
- Recently Released Wells
- Recent Completions

Plus access to articles via a bespoke version of the *whatmapLive!*, with detailed geological layers, culture, well and field information.

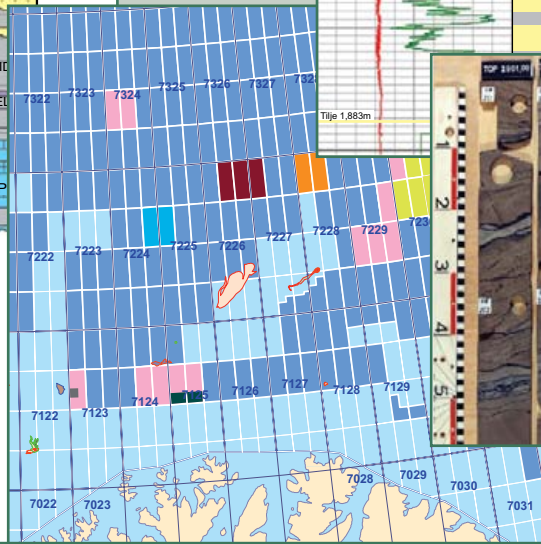

Digest online at:

**[www.canadiandiscovery.co.uk](http://www.canadiandiscovery.co.uk)**

Interpretive map

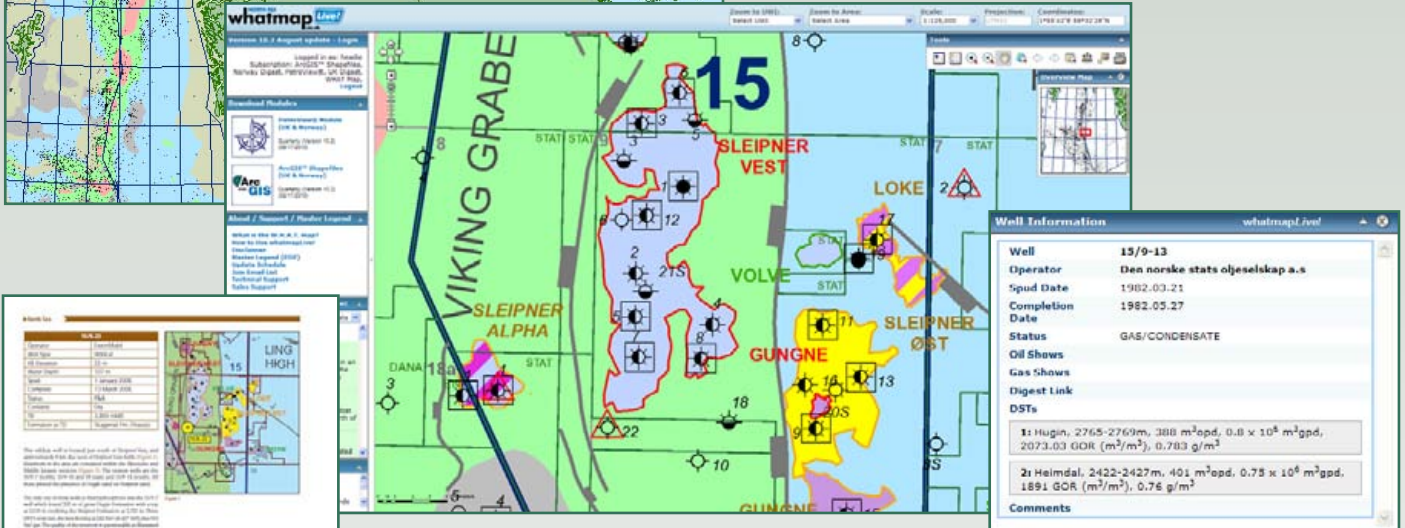

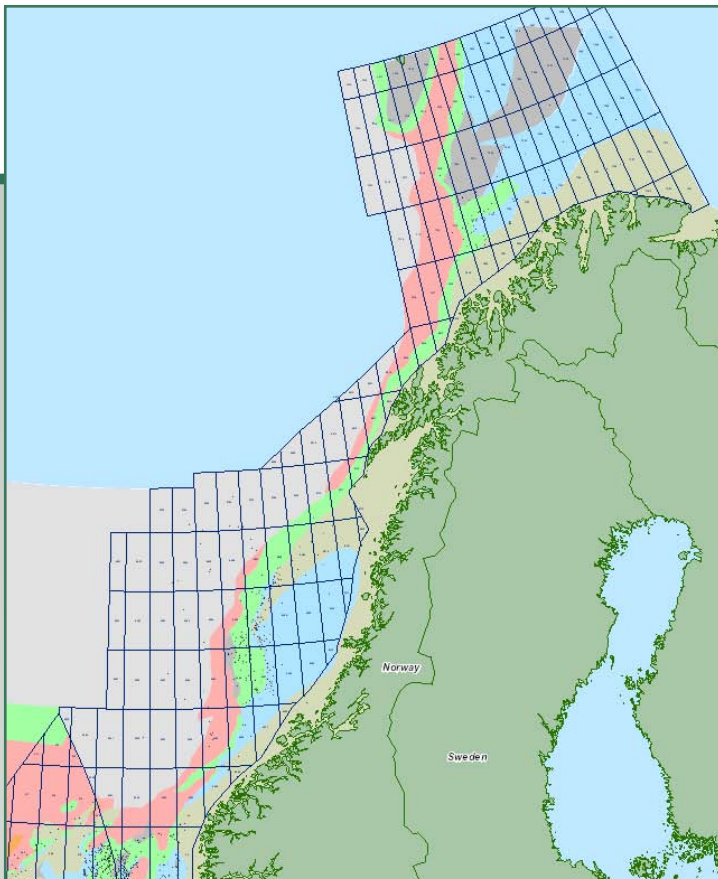

Norway Discovery Digest content includes:

- In-depth well reviews of recently released and recently completed wells.
- Reviews of licensing rounds.
- Detailed articles highlighting geological aspects of offshore Norway. (e.g. Åre versus Spekk Source Rocks)
- Investigative reviews of prospective acreage, both open and possible farm-in.

All reviews are written by senior geoscience professionals, and supported with well logs, schematic cross-sections, stratigraphic charts, seismic and reference maps.

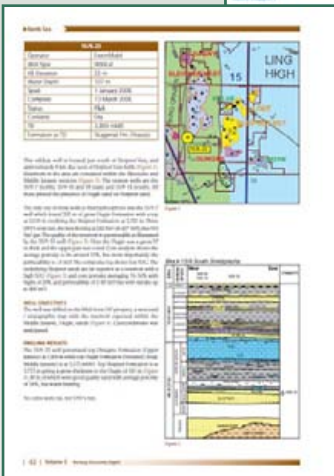

The Norway Discovery Digest includes access via interactive web-based map interface. The map includes:

- Detailed geology of offshore Norway (fault pattern, source rock presence and maturity and, to include at a later date, reservoir distribution).
- Cultural base map with detailed structural framework.
- Geologically focused commentary on all non-released wells.
- DST information for all exploration and appraisal wells.
- Updated review of well result as wells are released.
- Regular updates to capture all new well and field information.

Interactive mapping interface

Test information for exploration and appraisal wells

Access Norway Discovery Digest articles through the interactive map interface

An annual subscription includes:

- Norway Discovery Digest in hard copy
- Cover-to-cover, indexed digital PDF on CD-Rom
- Online company-wide web access, including searchable archives for all content from Volume 1 to present
- Access via interactive web-based map interface (Norwegian portion of the whatmapLive!)

The Norway Discovery Map is also available in PetroView® and ArcGIS™ through the WHAT Map product line.
