HYDROCARBON POTENTIAL OF PRE-CASPIAN BASIN,
KAZAKHSTAN AND RUSSIA

Contents

Executive Summary

General Introduction

Exploration and Production History

- 3.1 Introduction
 - 3.2 Exploration History
 - 3.3 Production History
 - 3.4 Current Activity
-

Structural framework

- 4.1 Introduction
 - 4.2 Regional Structural Setting
 - 4.3 Basinal Structural Elements
 - 4.4 Basin Evolution
-

Geophysical Interpretation

- 5.1 Introduction
 - 5.2 Gravity and Magnetic Features
 - 5.3 Seismic Interpretation
 - 5.4 Halokinesis
-

6 Stratigraphy

- 6.1 Introduction
 - 6.2 Pre-Cambrian and Lower Palaeozoic
 - 6.3 Devonian
 - 6.4 Carboniferous
 - 6.5 Permian
 - 6.6 Triassic
 - 6.7 Jurassic
 - 6.8 Cretaceous
 - 6.9 Paleogene-Quaternary
-

7 Hydrocarbon Source Rocks

- 7.1 Introduction
 - 7.2 Distribution of Source Rocks
 - 7.3 Oil-Source Rock Correlation
 - 7.4 Maturity
 - 7.5 Migration
 - 7.6 Summary
-

8 Reservoirs

- 8.1 Introduction
 - 8.2 Distribution and Characteristics of Reservoirs
 - 8.3 Reservoir Trends
 - 8.4 Pressure trends
 - 8.5 Summary
-

9 Trapping Mechanisms

- 9.1 Introduction

- 9.2 Pre-Salt Traps
- 9.3 Post-Salt Traps
- 9.4 Summary

- 10 Play Concepts
- 10.1 Introduction
- 10.2 Pre-Salt Play Concepts
- 10.3 Post-Salt Play Concepts
- 10.4 Summary

Bibliography

HDROCARBON POTENTIAL OF PRE-CASPIAN BASIN,KAZAKHSTAN AND RUSSIA

LIST OF FIGURES

- 2.1 Study Area
- 2.2 Database

-
- 3.1 Hydrocarbon Seeps
 - 3.2 Location of Deep Wells and Seismic Coverage
 - 3.3 Foreign Joint Venture

-
- 4.1 Regional Structural Setting
 - 4.2 Structural Elements and Depth to Basement
 - 4.3 Structural Style of Basin Margin – South-East
 - 4.4 Structural Style of Basin Margin – North-West (Karpen/Starshinov)
 - 4.5 Structural Style of Basin Margin – East (Alibeekmola/Kenkiyak)
 - 4.6 Structural Style of Basin Margin – East (Karatyube/Kopa)
 - 4.7 Structural Style of Basin Margin – South-East (Tortay/Karagon)
 - 4.8 Structural Style of Basin Margin – South (Prorva/Tengiz/Karaton)
 - 4.9 Plate Tectonic Evolution
 - 4.10 Summary of the Major Tectonic Elements in the Pre-Caspian Basin

-
- 5.1 Gravity Features
 - 5.2 Consolidated Crustal Thickness
 - 5.3 Magnetic Features
 - 5.4 Time-Depth Curves – Northern Flank of Basin
 - 5.5 Central Pre-Caspian. CDP Time Section Quality
 - 5.6 Northern Caspian Sea. CDP Time Section Quality and Pre-Salt Structuring
 - 5.7 CDP Time Section Adjacent to Karachaganak Field
 - 5.8 Seismic Line 108701 (CentreSpetsgeofizika) Western Flank of Basin (Yuzhno Plodoviten Field)
 - 5.9 Top Mid-Devonian (p3) Depth Map
 - 5.10 Isopach Map – Mid-Devonian to Basement
 - 5.11 Top Carboniferous (p2) Depth Map
 - 5.12 Base Kungurian Salt (p1) Depth Map
 - 5.13 Distribution of Salt Domes and Swells
 - 5.14 Example of Salt-features in the Ural River area
 - 5.15 Seismic Line 108805 (CentreSpetsgeofizika) illustrating salt withdrawal and inter-dome features
 - 5.16 Formation of salt domes

-
- 6.1 Lithostratigraphic Correlation
 - 6.2 Location map of Well Correlation Figures
 - 6.3 Well correlation for the Devonian of the Northern and Eastern margins
 - 6.4 Palaeogeography of the Middle Devonian
 - 6.5 Palaeogeography of the Upper Devonian
 - 6.6 Well Correlation for Pre-Kungurian in the West of the Basin
 - 6.7 Palaeogeography of the Lower Carboniferous
 - 6.8 Well Correlation for Lower Carboniferous of the Northern Basin Margin
 - 6.9 Well Correlation for the Northern Basin Margin
 - 6.10 Well Correlation for the Visean stage of the Eastern Basin Margin
 - 6.11 Palaeogeography of the Middle Carboniferous
 - 6.12 Well Correlation for the Middle Carboniferous of the Northern Basin Margin
 - 6.13 Well Correlation for the Middle and Upper Carboniferous of the Eastern Basin Margin
 - 6.14 Well Correlation for the Middle and Upper Carboniferous of the South-Eastern Basin Margin
 - 6.15 Palaeogeography of the Upper Carboniferous
 - 6.16 Isopach of Top Carboniferous to Middle Devonian (P2-P3)
 - 6.17 Isopach of Base Kungurian to Top Carboniferous (P1-P2)
 - 6.18 Palaeogeography of the Lower Permian
 - 6.19 Well Correlation for the Lower Permian (Pre-Kungurian) of the Northern Basin Margin
 - 6.20 Well Correlation for the Lower Permian (Pre-Kungurian) of the Eastern Basin Margin
 - 6.21 Well Correlation for the Lower Permian (Pre-Kungurian) of the South-Eastern Basin Margin
 - 6.22 Palaeogeography of the Upper Permian
 - 6.23 Palaeogeography of the Triassic

- 6.24 Well Correlation for the Lower and Middle Triassic
 - 6.25 Well Correlation for the Upper Triassic of the Central and Southern Basin
 - 6.26 Palaeogeography of the Jurassic
 - 6.27 Well Correlation for the Middle Jurassic of the Central and South-Eastern
 - 6.28 Well Correlation for the Jurassic of the Southern Basin
 - 6.29 Well Correlation for the Upper Jurassic of the West Central Basin
 - 6.30 Palaeogeography of the Cretaceous
 - 6.31 Well Correlation for the Lower Cretaceous of the Central and South-Eastern Basin
 - 6.32 Well Correlation for the Lower Cretaceous of the South-Eastern Basin
 - 6.33 Well Correlation for the Upper Cretaceous of the Northern Basin
-

- 7.1 Source Rock Distribution
 - 7.2 Van Krevelan Diagram
 - 7.3 API Gravity Pre-and Post –Salt
 - 7.4 API vs Depth
 - 7.5 Triterpanes from Tengiz Oils and associated Source Rocks
 - 7.6 Saturate/Aromatic Distribution and Depth Trend for Pre-and Post –Salt Oils
 - 7.7 Relationship of API Gravity and Saturate/Aromatic Ratio
 - 7.8 Pristane/Phytane Ratio. Distribution and Depth Trend for Pre-and Post –Salt Oils
 - 7.9 Temperature vs depth
 - 7.10 Temperature at Base Kungurian
 - 7.11 Temperature at Top Carboniferous (P2)
 - 7.12 Temperature at Middle Devonian (P3)
 - 7.13 Vitrinite Reflectance vs Depth
 - 7.14 Burial History. Aralsor-1 Well
 - 7.15 Calibration of Thermal Geochemistry. Aralsor-1 Well
 - 7.16 Generation of Oil and Gas. Aralsor-1 Well
 - 7.17 Calibration of Thermal Geochemistry. Makat Field
 - 7.18 Burial History. Makat Field
 - 7.19 Generation of Oil and Gas. Makat Field
 - 7.20 Burial History. Kozhasay Field
 - 7.21 Temperature profiles from the Yenbek-Temir Arch
 - 7.22 Calibration of Thermal Geochemistry. Kozhasay Field
 - 7.23 Calibration of Thermal Geochemistry. Karpov-2 Well
 - 7.24 Burial History. Karpov-2 Well
 - 7.25 Generation of Oil and Gas. Karpov-2 Well
 - 7.26 Source-Reservoir Relation South Emba Trough
-

- 8.1 Porosity vs Permeability
 - 8.2 Porosity vs Permeability by Principal Lithology
 - 8.3 Histogram. Porosity vs Permeability by Principal Lithology
 - 8.4 Porosity vs Depth by Lithology
 - 8.5 Porosity vs Depth by Lithology
 - 8.6 Porosity Distribution by Tectonic Area
 - 8.7 Permeability Distribution by Tectonic Area
 - 8.8 Porosity vs Permeability by Tectonic Area
 - 8.9 Hydrocarbon Density by Stratigraphic Age
 - 8.10 Hydrocarbon Density by Tectonic Area
 - 8.11 Height of Hydrocarbon Column by Stratigraphic Age
 - 8.12 Fluid Contact Depth by Tectonic Area
 - 8.13 Porosity by Stratigraphic Age
 - 8.14 Geometric Mean Permeability by Stratigraphic Age
 - 8.15 Porosity vs Permeability by Stratigraphic Age
 - 8.16 Temperature vs Depth by Stratigraphic Age
 - 8.17 Temperature vs Depth by Tectonic Area
 - 8.18 Field Crestal Pressures
 - 8.19 Permian-Devonian Pressures
 - 8.20 Field Water Salinities (Pre-Salt)
-

- 9.1 Seismic Line Showing Stacked Carboniferous and Permian Reef Developments
 - 9.2 Regional Seismic Line Showing Large Carboniferous Atoll
 - 9.3 Seismic Line Across the Teplov Field (Permian Reef)
 - 9.4 Section Showing Incision of Devonian by Channel
 - 9.5 Section Showing 'Buried Highs' along Margin of Pre-Caspian
 - 9.6 Seismic Line Showing Diapiric Structure and Drape of Mesozoic section
 - 9.7 Seismic Line Showing Truncation of the Mesozoic by Permian Salt
 - 9.8 Seismic Line Showing Jurassic Channel
 - 9.9 Seismic Line Showing Subcrop and Truncation of the Permo-triassic
-

- 10.1 Play Fairways
 - 10.2 Schematic Section Showing the Pre-Artinskian Unconformity
 - 10.3 Schematic Section Showing the Zabrunie Field
-

HYDROCARBON POTENTIAL OF PRE-CASPIAN BASIN,
KAZAKHSTAN AND RUSSIA

LIST OF ENCLOSURES

1. Study Area Database
2. Foreign Joint Venture
3. Depth to Basement and Structural Elements
4. Geoseismic Cross-sections
5. Depth Map Intra Permian (p3)
6. Depth Map Top Carboniferous (p2)
7. Depth map Base Kungurian Salt (p1)
8. Salt Features
9. Seismic Line – 108701
10. Seismic Line – 108805
11. Lithostratigraphic Correlation
12. Play Fairways
